Okay but Deb says it is good to know for the future so she already responded with the S. Fork numbers. I think you can slow it down a bit with BOEM. You could let them know we would like the numbers but that we gave them the S. Fork numbers for today. Thanks for all your help on this.

Still no word from BOEM, but many in the offshore wind space are on a day long training being put on by the Federal Permitting Improvement Steering Committee.

We'll see if we can find some credible estimates while we wait for BOEM.

Pat

It would be good to know the numbers for the future.

Thanks. I've let BOEM know it would be great to get an estimate this morning or today. We'll let you know if we get anything else you can pass along. Thanks.

Thanks. I told HQ we don't have the numbers for all 8 windfarms and I gave them the numbers for South Fork.

Subject: Electrification Estimates for the Massachusetts and Rhode Island Lease Areas

Hi Mary and Michelle,

As news of our South Fork permit filters up through the Agency, we've been asked a few questions about the impacts of *all* offshore wind in the Massachusetts and Rhode Island lease areas. Based on projects that have made themselves known to EPA Region 1, we're estimating about 8,000 MW of installed capacity in the Massachusetts and Rhode Island lease areas. Do you all have any estimates on how many homes 8,000 MW of offshore wind would electrify?

Any assistance on this question would be greatly appreciated.

Pat
